Question 1

✓ Correct

What is the baseline value from the security template for the policy setting item of LockoutBadCount?

10

Question 2

✓ Correct

What is the baseline value from the security template for the policy setting item of MinimumPasswordLength?

14

Question 3

✓ Correct

Is the PC10 system in compliance with the security template based on the gap analysis results?

☐ A Yes

☒ B No ✓ Correct

Question 4

✓ Correct

Performing gap analysis forces systems into compliance.

☐ A True

☒ B False ✓ Correct

Question 5

✓ Correct

Gap analysis is a process that identifies how an organization's security systems deviate from those required or recommended by a framework.

☒ A True ✓ Correct

☐ B False

Question 6

✓ Correct

When should gap analysis be performed? (Select all that apply)

☒ A when first adopting a framework ✓ Correct

☒ B when meeting a new industry or legal compliance requirement ✓ Correct

☒ C after significant time has past ✓ Correct

☐ D when decommissioning legacy hardware

Question 7

✓ Correct

What is the purpose of a gap analysis?

- ☒ A discovering the differences between the intended or expected configuration of a system and its actual operating configuration ✓ Correct
- ☐ B exploring the source code of a open source application for flaws and vulnerabilities
- ☐ C determining the probability and likelihood of a threat causing harm to an asset
- ☐ D evaluating the level of compliance to a regulation or contractual obligation

Question 8

✓ Correct

Which of the following statements is false in regard to gap analysis?

- ☐ A Some variations from a baseline may be more secure
- ☐ B Some variations from a baseline are less secure
- ☒ C A single security template is sufficient to analyze all systems ✓ Correct
- ☐ D Security template selection should be specific to its product version and build number
